Autobackup

This program is freeware, and has no time limitations.

You can download it from http://www.acutesoftware.com.au/as_bck30.zip

- you select a list of folders to check
- Autobackup copies all files in the folder list which have been modified since the last backup to a single folder.

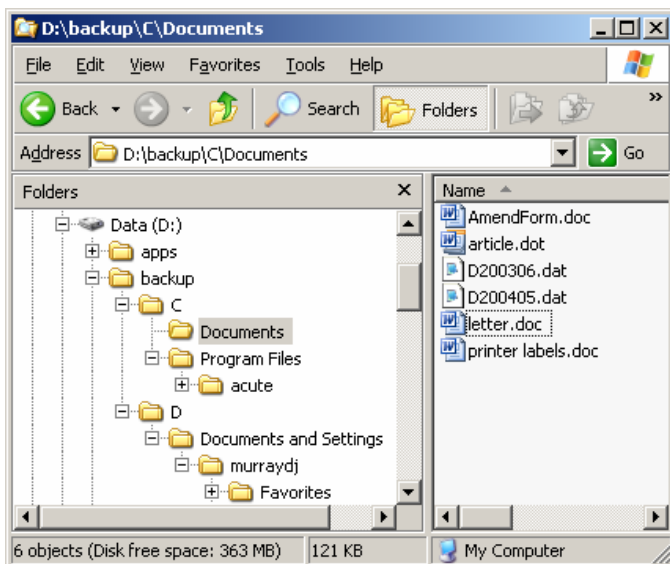

- **Autobackup does NOT keep the original directory structure** (this is done in the PRO version)
- you can log to the diary which files are backed up.

Autobackup-Pro

This program needs to be purchased (\$24.95 US).

<http://www.acutesoftware.com.au/order.html>]

There is no 'shareware' version to be downloaded, apart from the free version above.

- Autobackup-Pro has all the above features, as well as:

- **keeps files in the original folder structure**

- backups can be run silently so or users can't cancel them
- you can exclude folders to be backed up (e.g. exclude any folder with BACKUP in it).
